- High overall volume of satisfied customers across major third-party storefronts.  Walmart +3

so with this tracking info the package was sent from farmers branch to desoto?

Yes, that is exactly correct.

The tracking history confirms this exact route:

- **Departure:** Perfume Empire packaged your order at their main warehouse facility in **Farmers Branch, TX**.
- **Carrier Intake:** The shipping carrier picked up the package and transported it to the regional hub in **DeSoto, TX**, where it received its official **Origin Scan** at 4:12 PM on July 7, 2026.

If the shipping carrier is on trac and the first entry they have is origin in desoto...well then they arent the shipping carrier

OnTrac actually is the direct shipping carrier here, as DeSoto is the location of their primary, massive regional distribution hub for the entire Dallas-Fort Worth metroplex.  OnT... +1

The package route makes sense logistically because of how OnTrac operates its network:

- **The Address Discrepancy:** While Perfume Empire physically packs the box at their warehouse in Farmers Branch, OnTrac doesn't scan the individual tracking number at the merchant's loading dock.
- **The "Origin Scan":** The package is loaded onto a bulk trailer with thousands of other orders and driven down to the central OnTrac Dallas Hub located at **802 E Centre Park Blvd, DeSoto, TX 75115**.  OnT... +1
- **First Physical Scan:** Your tracking entry "On its way to OnTrac" means the digital billing data was created in Farmers Branch. The very first time a laser overhead belt scanner physically registers your specific tracking barcode is when it arrives at that DeSoto facility, which is why it registers as the official **Origin Scan**.  OnT... +1

From that point, OnTrac handled the linehaul across the country directly to their Fontana, CA hub before moving it to Milpitas for final delivery.

check this tine stamp and explain delay

The order confirmation email timestamp shows that Perfume Empire printed your shipping label on **Tuesday, July 7, 2026, at 1:27 PM**, but your package didn't receive its first physical scan at the carrier's hub until **4:12 PM**.

This **2-hour and 45-minute gap** represents a standard fulfillment handling delay, not a logistical failure, and breaks down to two simple warehouse steps:
